3D Systems Leads With 3D Content-To-Print At TCT Live

- Complete Line of 3D Printers: Color, Precision, Affordability
- Hands-On Demonstrations of Alibre 3D CAD Software
- On Demand Global Parts Service; Design-To-Manufacturing

ROCK HILL, South Carolina –September 20, 2012 – [3D Systems Corporation](#)

(NYSE:DDD) announced today that it will showcase its comprehensive 3D content-to-print portfolio at Time Compression Technologies' TCT Live 2012, September 25-26, 2012 at the National Exhibition Centre, NEC, in Birmingham, UK in booths N12 and T2.

[3D Systems](#) will demonstrate its unmatched portfolio of 3D printers, including its new line of [ProJet™ 3500](#) printers that offer ultra-high definition durability and precision wax capabilities. Productivity and performance will be highlighted through its [ProJet™ 7000](#) that combines push button simplicity with real [SLA®](#) part performance and its [ZPrinter® 650](#), offering speed and vibrant, full color. 3D Systems will display its latest [on demand parts services](#), [Alibre® 3D CAD software](#) and its personal color printers including [Cube®](#), [3DTouch™](#) and the [ProJet™ 1500](#), bringing together complete ideation-to-production capabilities for professionals and consumers.

"We are thrilled to play an expanding role at this year's TCT Live exhibition, demonstrating complete 3D content-to-print solutions," said Cathy Lewis, Vice President of Global Marketing, 3D Systems. "From the highest definition to speed, from full color to unrivaled part performance, we are democratizing creativity through access to affordable [3D printers](#), compelling [3D content](#) and [on demand parts](#) services for the benefit of our growing, global customer base."

About 3D Systems Corporation

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike. The company also provides CAD software and plugins, and affordable consumer create-and-make printers, apps and services. Its expertly integrated solutions replace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, create, communicate, prototype or produce real parts, empowering customers to create and make with confidence.
