3D SYSTEMS CORPORATION
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(amounts in thousands, except per share data)

(1) Basis of Presentation

The accompanying condensed consolidated financial statements include the accounts of 3D Systems Corporation and its subsidiaries (collectively, the “Company”). All significant intercompany transactions and balances have been eliminated in consolidation. The condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) and the rules and regulations of the Securities and Exchange Commission (“SEC”) applicable to interim reports. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements and should be read in conjunction with the audited financial statements included in the Company’s Annual Report on Form 10-K (“Form 10-K”) for the year ended December 31, 2007.

In the opinion of management, the unaudited financial statements contain all adjustments, consisting of adjustments of a normal recurring nature, necessary to present fairly the financial position, results of operations, and cash flow for the periods presented. The results of operations for the quarter and nine months ended September 30, 2008 are not necessarily indicative of the results to be expected for the full year.

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements. Actual results may differ from those estimates and assumptions.

Certain prior period amounts have been reclassified to conform to their current year presentation.

(2) Inventories

Components of inventories, net at September 30, 2008 and December 31, 2007 were as follows:

<i>(in thousands)</i>	2008	2007
Raw materials	\$ 1,613	\$ 835
Inventory held by assemblers	—	197
Work in process	25	126
Finished goods and parts	24,599	21,189

Less: Accumulated depreciation and amortization	(31,046)	(29,240)	
Total property and equipment, net	<u>\$ 24,891</u>	<u>\$ 21,331</u>	

3D SYSTEMS CORPORATION
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(amounts in thousands, except per share data)

On February 28, 2008, the Company purchased certain equipment from its former customer, Tangible Express, LLC. Of the \$5,300 of equipment and materials purchased, \$3,000 was included in property and equipment at September 30, 2008 and the balance was primarily sold to customers.

Depreciation and software amortization expense for the quarter and nine months ended September 30, 2008 was \$1,303 and \$3,486, respectively, compared to \$1,099 and \$3,152 for the quarter and nine months ended September 30, 2007. For the quarter and nine months ended September 30, 2008, the Company recognized software amortization expense for its capitalized enterprise resource planning ("ERP") system of \$163 and \$487, respectively, compared to \$160 and \$434 for the quarter and nine months ended September 30, 2007.

The Company holds approximately \$3,454 of assets related to its Grand Junction facility, net of accumulated depreciation, as assets held for sale, comprised primarily of \$3,018 of building and improvements, net of accumulated depreciation, and \$436 of land. These assets are classified as Assets held for sale on the Condensed Consolidated Balance Sheets at September 30, 2008 and December 31, 2007. See Note 6.

(4) Intangible Assets

Intangible assets other than goodwill at September 30, 2008 and December 31, 2007 were as follows:

<i>(in thousands)</i>	September 30, 2008		
	Gross Carrying Amount	Accumulated Amortization	Net
Licenses	\$ 5,875	\$ (4,967)	\$ 908
Patent costs	16,180	(13,314)	2,866
Other intangible assets	8,968	(8,687)	281
Total	\$ 31,023	\$ (26,968)	\$ 4,055

<i>(in thousands)</i>	December 31, 2007		
	Gross Carrying Amount	Accumulated Amortization	Net
Licenses	\$ 5,875	\$ (4,595)	\$ 1,280
Patent costs	15,908	(13,176)	2,732
Other intangible assets	8,968	(7,810)	1,158
Total	\$ 30,751	\$ (25,581)	\$ 5,170

For the nine months ended September 30, 2008 and 2007, the Company capitalized \$352 and \$521, respectively, of costs incurred to acquire, develop and extend patents in the United States and various other countries.

Amortization expense related to licenses, patent costs and other intangible assets for the quarters and nine months ended September 30, 2008 and 2007 was as follows:

<i>(in thousands)</i>	Quarter Ended Sept. 30,		Nine Months Ended Sept. 30,	
	2008	2007	2008	2007
Amortization expense:				
Licenses	\$ 124	\$ 124	\$ 372	\$ 372
Patent costs	64	368	218	915
Acquired technology costs	—	190	—	948
Other intangible assets	339	20	877	61
Total	\$ 527	\$ 702	\$ 1,467	\$ 2,296

3D SYSTEMS CORPORATION
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(amounts in thousands, except per share data)

(5) Accrued and Other Liabilities

Accrued liabilities at September 30, 2008 and December 31, 2007 were as follows:

<i>(in thousands)</i>	2008	2007
Compensation and benefits	\$ 3,434	\$ 4,916
Vendor accruals	3,360	2,848
Accrued professional fees	979	1,287
Accrued taxes	1,152	1,381
Royalties payable	320	645
Non-contractual obligation to repurchase inventory held by assemblers	—	197
Accrued interest	63	74
Accrued other	751	900
	<u>\$ 10,059</u>	<u>\$ 12,248</u>

Other liabilities at September 30, 2008 and December 31, 2007 were as follows:

<i>(in thousands)</i>	2008	2007
Defined benefit pension obligation	\$ 2,368	\$ 2,367
Other long-term liabilities	1,807	1,871
	<u>\$ 4,175</u>	<u>\$ 4,238</u>

(6) Borrowings

The Company's debt at September 30, 2008 and December 31, 2007 was \$3,085 and \$3,325, respectively, and represented industrial development revenue bonds related to the Grand Junction facility. See Note 3. The interest rate at September 30, 2008 and December 31, 2007 was 8.15% and 3.52%, respectively. Due to disruptions in global credit markets, the interest rate at September 30, 2008 was abnormally high and has subsequently returned to a more normal level. On May 7, July 31, and October 27, 2008, the bank waived the Company's non-compliance with certain of the financial covenants set forth in this facility for the periods ended March 31, June 30, and September 30, 2008, respectively, each in consideration for a \$32 non-refundable waiver fee.

The Company ceased operations at its Grand Junction facility at the end of April 2006. The facility is currently listed for sale or lease. Upon sale of the Grand Junction facility, the Company expects to pay off the industrial development revenue bonds. Following cessation of operations at the Grand Junction facility, the Company reclassified these bonds from long-term debt to current liabilities. Once the Company's obligations under these bonds have been satisfied, the Company expects the \$1.2 million of cash restricted as part of the industrial development revenue bond agreements to be released to the Company.

Such restricted cash is held on deposit as partial security for the Company's obligations under the industrial development revenue bonds discussed above, and therefore is not available to the Company for general use.

3D SYSTEMS CORPORATION
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(amounts in thousands, except per share data)

(7) Hedging Activities and Financial Instruments

The Company conducts business in various countries using both the functional currencies of those countries and other currencies to effect cross border transactions. As a result, the Company is subject to the risk that fluctuations in foreign exchange rates between the dates that those transactions are entered into and their respective settlement dates will result in a foreign exchange gain or loss. When practicable, the Company endeavors to match assets and liabilities in the same currency on its balance sheet and those of its subsidiaries in order to reduce these risks. The Company also, when it considers it appropriate, enters into foreign currency contracts to hedge exposures arising from these transactions. The Company has not adopted hedge accounting under Statement of Financial Accounting Standards (“SFAS”) No. 133, “Accounting for Derivatives and Hedging Activities,” as amended by SFAS No. 137 and SFAS No. 138, and all gains and losses (realized or unrealized) are recognized in cost of sales in the Condensed Consolidated Statements of Operations.

At September 30, 2008 and December 31, 2007, these contracts included contracts for the purchase of currencies other than the U.S. dollar. The dollar equivalent of the foreign currency contracts and the related fair values as of September 30, 2008 and December 31, 2007 were as follows:

<i>(in thousands)</i>	Foreign Currency Purchase Contracts	
	2008	2007
Notional amount	\$ 1,074	\$ 2,905
Fair value	1,041	2,891
Net unrealized loss	<u>\$ (33)</u>	<u>\$ (14)</u>

The foreign currency contracts outstanding at September 30, 2008 expire at various times between October 22, 2008 and November 19, 2008. The foreign currency contracts outstanding at December 31, 2007 expired at various times between January 3, 2008 and February 13, 2008.

Changes in the fair value of derivatives are recorded in cost of sales in the Condensed Consolidated Statements of Operations. Depending on their fair value at the end of the reporting period, derivatives are recorded either in prepaid expenses and other current assets or in accrued liabilities on the Condensed Consolidated Balance Sheets.

The total impact of foreign currency items on the Condensed Consolidated Statements of Operations for the quarter and nine months ended September 30, 2008 were gains (losses) of \$(249) and \$191, respectively, compared to gains of \$18 and \$31 for the quarter and nine months ended September 30, 2007.

3D SYSTEMS CORPORATION
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(amounts in thousands, except per share data)

(8) Stock-based Compensation Plans

The Company records stock-based compensation expense in selling, general and administrative expenses in the Condensed Consolidated Statements of Operations. Stock-based compensation expense for the quarters and nine months ended September 30, 2008 and 2007 was as follows:

<i>(in thousands)</i>	Quarter Ended Sept. 30,		Nine Months Ended Sept. 30,	
	2008	2007	2008	2007
Options	\$ —	\$ 129	\$ —	\$ 671
Restricted stock awards	288	458	1,144	1,576
Total stock-based compensation expense	<u>\$ 288</u>	<u>\$ 587</u>	<u>\$ 1,144</u>	<u>\$ 2,247</u>

The expense for the nine-month period ended September 30, 2007 included \$497 of stock-based compensation expense primarily related to the acceleration of expense with respect to restricted stock awards related to the separation from service of the Company's former Chief Financial Officer in the first quarter of 2007.

The number of shares of restricted common stock issued and the weighted average fair value per share during the quarters and nine months ended September 30, 2008 and 2007 were as follows:

<i>(in thousands, except per share amounts)</i>	Quarter Ended September 30,			
	2008		2007	
	Shares Awarded	Weighted Average Fair Value	Shares Awarded	Weighted Average Fair Value
Restricted stock	7	\$ 9.55	55	\$ 21.02

<i>(in thousands, except per share amounts)</i>	Nine Months Ended September 30,			
	2008		2007	
	Shares Awarded	Weighted Average Fair Value	Shares Awarded	Weighted Average Fair Value
Restricted stock	39	\$ 10.48	70	\$ 21.00

In the nine months ended September 30, 2008, the Company granted stock awards covering 24 shares of common stock pursuant to the Company's 2004 Restricted Stock Plan for Non-Employee Directors. The Company also issued restricted stock awards covering 7 and 15 shares of common stock to certain employees during the quarter and nine months ended September 30, 2008, respectively, pursuant to the Company's 2004 Incentive Stock Plan.

3D SYSTEMS CORPORATION
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(amounts in thousands, except per share data)

(9) Earnings (Loss) Per Share

The Company presents basic and diluted earnings (loss) per share (“EPS”) amounts. Basic EPS is calculated by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding during the applicable period. Diluted EPS is calculated by dividing net income (loss) by the weighted average number of common and common equivalent shares outstanding during the applicable period. The following table reconciles basic weighted average outstanding shares to diluted weighted average outstanding shares for the quarters and nine months ended September 30, 2008 and 2007:

<i>(in thousands, except per share amounts)</i>	<u>Quarter Ended Sept. 30,</u>		<u>Nine Months Ended Sept. 30,</u>	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
Numerator:

Add: Effect of dilutive securities				
Stock options and other equity compensation	—	661	—	—
Denominator for dilutive EPS	<u>22,366</u>	<u>22,499</u>	<u>22,348</u>	<u>20,115</u>
Earnings (loss) per share:				
Basic	\$ (0.04)	\$ 0.02	\$ (0.36)	\$ (0.40)
Diluted	<u>\$ (0.04)</u>	<u>\$ 0.01</u>	<u>\$ (0.36)</u>	<u>\$ (0.40)</u>

No dilutive securities were included in the diluted weighted average shares outstanding for periods with net losses, because the effect of their inclusion would have been anti-dilutive; that is, they would have reduced the net loss per share.

(10) Income Taxes

The Company used effective tax rates of (57.2%) and (15.2%) for the quarter and nine months ended September 30, 2008, respectively, compared to 42.9% and (5.6%) for the quarter and nine months ended September 30, 2007. Tax expense relates primarily to income from foreign operations.

Tax years 2004 to 2007 remain subject to examination by the U.S. Internal Revenue Service. Should the Company utilize any of its U.S. loss carryforwards, which date from 1997, these would be subject to examination. The Company files income tax returns (which are open to examination beginning in the year shown in parentheses) in France (2004), Germany (2000), Japan (2003), Italy (2003), Switzerland (2003) and the United Kingdom (2005).

(11) Segment Information

The Company operates in one reportable business segment in which it develops, manufactures and markets worldwide 3-D modeling, rapid prototyping and manufacturing systems designed to reduce the time it takes to produce three-dimensional objects. The Company conducts its business through operations in the United States, sales and service offices in the European Community (France, Germany, the United Kingdom and Italy) and the Asia-Pacific region (Japan and Hong Kong), and a research and production facility in Switzerland. Revenue from unaffiliated customers attributed to Germany includes sales by the Company's German unit to customers in countries other than Germany. The Company has historically disclosed summarized financial information for the geographic areas of operations as if they were segments in accordance with SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information."

Such summarized financial information concerning the Company's geographical operations is shown in the following tables:

<i>(in thousands)</i>	<u>Quarter Ended Sept. 30,</u>		<u>Nine Months Ended Sept. 30,</u>	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
Revenue from unaffiliated customers:

(12) Commitments and Contingencies

On March 14, 2008, DSM Desotech Inc. filed a complaint in an action titled DSM Desotech Inc. v. 3D Systems Corporation in the United States District Court for the Northern District of Illinois (Eastern Division) asserting that the Company engages in anticompetitive behavior with respect to resins used in large-frame stereolithography machines. The complaint further asserts that the Company is infringing two of DSM Desotech's patents relating to stereolithography machines. The Company understands that DSM Desotech estimates the damages associated with its claims to be in excess of \$40,000. On or about June 6, 2008, the Company filed a motion to dismiss the non-patent causes of action. The Company also filed an answer to the patent-related claims and asserted various defenses and counterclaims. The Company intends to vigorously contest all of the claims asserted by DSM Desotech.

The Company is also involved in various other legal matters incidental to its business. The Company's management believes, after consulting with counsel, that the disposition of these other legal matters will not have a material effect on the Company's consolidated results of operations or consolidated financial position.

(13) Fair Value Measurements

In September 2006, the Financial Accounting Standards Board ("FASB") issued SFAS No. 157, "Fair Value Measurements." SFAS No. 157 introduces a framework for measuring fair value and expands required disclosure about fair value measurements of assets and liabilities. For financial assets and liabilities, SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. The Company adopted the standard for those assets and liabilities as of January 1, 2008, and the impact of adoption was not significant.

SFAS No. 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS No. 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company utilizes the market approach to measure fair value for its financial assets and liabilities. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.

3D SYSTEMS CORPORATION
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(amounts in thousands, except per share data)

Assets and liabilities measured at fair value on a recurring basis are summarized below:

<i>(in thousands)</i>	Fair Value Measurements as of Sept. 30, 2008			
	Level 1	Level 2	Level 3	Total
Description				
Short-term investments ¹	\$ 13,132	\$ —	\$ —	\$ 13,132
Restricted cash ¹	1,200	—	—	1,200
Currency derivative contracts ¹	1,041	—	—	1,041
Total	\$ 15,373	\$ —	\$ —	\$ 15,373

¹ Unrealized gains or losses on short-term investments, restricted cash and derivatives are recorded in the statement of operations at each measurement date.

The fair market value of level 1 currency derivative contracts at September 30, 2008 and December 31, 2007 was as follows:

<i>(in thousands)</i>	Foreign Currency Purchase Contracts	
	2008	2007
Notional amount	\$ 1,074	\$ 2,905
Fair value	1,041	2,891
Net unrealized gain (loss)	\$ (33)	\$ (14)

FASB Staff Position No. 157-2 delayed the effective date of SFAS No. 157 until fiscal years beginning after November 15, 2008, and interim periods within those fiscal years, for all nonfinancial assets and liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). We are assessing the impact of SFAS No. 157 on the Company's consolidated financial statements with respect to these nonfinancial assets and liabilities.

(14) Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115," which became effective January 1, 2008. SFAS No. 159 permits companies to choose to measure certain financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings at each subsequent reporting date. The implementation of this standard did not have a material impact on the Company's consolidated financial position or results of operations.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), "Business Combinations" ("SFAS No. 141R"). SFAS No. 141R provides revised guidance on how acquirers recognize and measure the consideration transferred, identifiable assets acquired, liabilities assumed, non-controlling interests, and goodwill acquired in a business combination. SFAS No. 141R also expands required disclosures surrounding the nature and financial effects of business combinations. SFAS No. 141R is effective, on a prospective basis, for fiscal years beginning after December 15, 2008. The Company is currently assessing the impact of SFAS No. 141R on its financial statements.

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities." SFAS No. 161 expands disclosures but does not change accounting for derivative instruments and hedging activities. The statement will become effective for the Company starting in January 2009. The Company is currently assessing the impact of SFAS No. 161 on its financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This discussion should be read in conjunction with the Condensed Consolidated Financial Statements and the notes thereto included in Item 1 of this Quarterly Report on Form 10-Q.

We are subject to a number of risks and uncertainties that may affect our future performance and that are discussed or referred to in greater detail in the sections entitled "Forward-Looking Statements" and "Cautionary Statements and Risk Factors" at the end of this Item 2 and in Item 1A of Part II of this Quarterly Report on Form 10-Q.

Business Overview

We design, develop, manufacture, market and service 3-D printing, rapid manufacturing, and prototyping systems and related products and materials that enable complex three-dimensional objects to be produced directly from computer data without tooling, greatly reducing the time and cost required to produce prototypes or customized production parts.

Our consolidated revenue is derived primarily from the sale of our systems, the sale of the related materials used by the systems to produce solid objects and the provision of services to our customers.

Recent Developments

New product developments

Since the beginning of 2008, we have continued our new product development and geographic expansion activities, resulting in the following introductions:

- In January 2008, we launched the ProJet™ HD 3000 3-D Production System, a new, professional, high-definition 3-D modeler that is based on our patented and proprietary Multi-Jet Modeling technology. The ProJet™ HD 3000 3-D Production System provides the choice of both high definition and ultra high definition build modes in a single system and is designed for a wide range of uses.
- In February 2008, we launched our ProJet™ DP 3000 3-D Production System, a 3-D Modeler that is designed to accurately, consistently and economically manufacture precision wax-ups for dental professionals. The user of the ProJet™ DP Production System scans a model, designs a virtual wax-up using 3-D software, then sends the data to the ProJet™ Production System to "print" wax-ups in layers; the system can generate hundreds of units each cycle.
- During March 2008, we began commercial shipments of our new, V-Flash™ Desktop Modeler to North American customers. This Modeler is the first product based on our new Film Transfer Imaging technology platform, and it is designed to build three-dimensional models within hours in a home or an office, enabling designers, engineers, hobbyists and students to imagine, design and build their ideas at their desks. We suspended our commercial shipments so that we could resolve several technical and performance issues that we discovered after we commenced our commercial shipments as well as improve the reliability of the V-Flash® Desktop Modeler. We believe that we have now resolved these issues, and we plan to resume a phased rollout of this new system in the fourth quarter. We have not recognized any revenue from the V-Flash® Desktop Modeler during 2008.
- We launched the new Sinterstation® Pro DM100 and the DM250 SLM Systems, two direct metal laser sintering systems that quickly build fully-dense parts from a wide range of metal materials for functional parts, tooling and prototypes.
- We began to sell our Accura® materials in Japan, expanding our portfolio of proven, dependable Accura® materials in Japan.
- In May 2008, we launched a 'Pro-Parts' Material Evaluation Web Site equipped with online pricing capability that may be used to order non-commercial Stereolithography (SLA®) and Selective Laser Sintering (SLS®) parts, enabling more designers and engineers to experience the benefits of Additive Manufacturing technology.

- In August 2008, we announced the immediate availability of:
 - Our new iPro™ 9000 SLA® Center, a new professional stereolithography system for the production of ultra high-definition ‘Pro-Parts’ from our integrated portfolio of proprietary Accura® Plastics; the new iPro™ 9000 SLA® Center is designed to quickly and economically produce durable plastic parts with unprecedented surface smoothness, feature resolution, edge definition and tolerances that rival the accuracy of CNC-machined plastic parts; and
 - Our cost-effective, high-definition ProJet™ SD 3000 3-D Printer for in-office model-making at design and manufacturing businesses. The ProJet™ SD 3000 Printer is an addition to our ProJet™ line of 3-D Printers that is designed to provide high-quality parts with exceptionally smooth surfaces and unmatched small feature detail, ideal for concept development, design verification, form-fit testing and product presentations.
- In October 2008, we announced the launch of:
 - the ProJet™ CPX 3000 3-D Production System, a new high-definition 3-D Printer designed for high-volume, extremely high-resolution production of finely detailed RealWax™ patterns from digital data; we plan to start shipping this new addition to our ProJet™ line of 3-D Printers during the fourth quarter of this year; and
 - the ProJet™ CP 3000 3-D Production System for the high-speed, high-volume production of RealWax™ casting patterns from digital data for foundry prototyping and end-use parts applications.
- We also announced in October the new iPro™ 9000 XL SLA® Center for the production of extra-large, high-definition ‘Pro-Parts’ for prototyping and end-use. This system is the largest currently available commercial stereolithography part-manufacturing system.
- We recently announced a completely new mid-range SLA® system, the new iPro™ 8000 SLA® Center, which we anticipate will contribute to sales in future quarters.
- We unveiled our plans to introduce a next-generation family of high-speed sintering systems — the sPro™ 140 and 230 SLS® Centers that are designed to provide best-in-class part quality and accuracy for the most demanding functional prototyping and end-use applications. We expect to begin taking orders for these systems in the fourth quarter of this year.
- In connection with our continuing efforts to expand our portfolio of proprietary materials,
 - We recently introduced Accura® ClearVue™ Plastic, another integrated stereolithography material with excellent transparency, outstanding durability and enhanced yields and manufacturability; and
 - We announced the availability of DuraForm® PP 100 Plastic, a new sintering material with the toughness and durability of molded polypropylene, through our Pro Parts Marketplace and Preferred Service Providers.

We believe it is important that we continue with our planned new product development activities so that we can take advantage of improved business conditions as they appear. Approximately 35% of our third-quarter 2008 revenue was derived from new products that we have introduced since the beginning of 2005.

Summary of 2008 financial results

As discussed in greater detail below, for the third quarter of 2008, consolidated revenue decreased by 7% to \$35.6 million from \$38.2 million in the third quarter of 2007, primarily as a result of lower large-frame systems' sales that were only partially offset by higher sales of materials and 3-D Printers. Following the introduction of our ProJet™ 3000 3-D Printers in early 2008, revenue from our 3-D Printers grew by 50% compared to the third quarter of 2007. Favorable foreign currency translation also contributed to our consolidated revenue in the third quarter of 2008.

Consolidated revenue for the nine months ended September 30, 2008 also declined by 7% to \$104.0 million from \$111.6 million in 2007. On a sequential-quarter basis, consolidated revenue in the first and third quarters of 2008 was below that in the corresponding 2007 quarters while consolidated revenue for the second quarter of 2008 increased modestly compared to the second quarter of 2007. In each quarter, this reflected lower systems' revenue. After decreasing modestly in the first quarter of 2008, materials' revenue increased in both the second and third quarters of 2008 while service revenue, which increased in the first and second quarters of 2008, declined by \$0.1 million in the third quarter.

Through the first nine months of 2008, foreign currency translation favorably affected our consolidated revenue by \$5.1 million compared to the 2007 period. On a sequential-quarter basis during 2008, we benefited from \$2.0 million of currency translation in the first quarter, an additional \$2.2 million in the second quarter and \$1.0 million in the third quarter. The strengthening of the U.S. dollar that occurred in the third quarter of 2008 substantially reduced the contribution of foreign currency translation in the third quarter of 2008.

Our operating loss for the third quarter of 2008 was \$0.5 million, reversing \$0.4 million of operating income in the 2007 third quarter. This operating loss arose from our lower revenue in the quarter and lower gross profit in the quarter, which were partially offset by a reduction in operating expenses, as discussed below.

Our loss from operations for the nine months ended September 30, 2008 and 2007 was \$6.6 million. On a sequential-quarter basis, our operating loss in the first nine months of 2008 declined from \$3.2 million in the first quarter to \$2.8 million in the second quarter and \$0.5 million in the third quarter.

Our operating expenses declined by \$1.2 million in the third quarter of 2008 and by \$4.8 million in the nine months ended September 30, 2008, compared to prior year periods, primarily reflecting lower selling, general and administrative ("SG&A") expenses. On a sequential-quarter basis, our operating expenses in the first nine months of 2008 declined by \$1.3 million in the first quarter, by \$2.3 million in the second quarter and by \$1.2 million in the third quarter. We expect our SG&A expenses for the fourth quarter of 2008 to fall into the range of \$10 million to \$11 million.

At September 30, 2008 our backlog declined to \$1.0 million, a 68% reduction from the \$3.1 million of backlog at December 31, 2007. We believe that our level of backlog at September 30, 2008 is generally consistent with the normal operating trends in our business.

Internal Controls

As we have previously disclosed, at December 31, 2007 material weaknesses existed relating to our internal controls over financial reporting with respect to the oversight and review of our inventory costing system and the design and operation of controls for certain inventory shipments and recognition of the related revenue. We completed a number of remedial actions to correct these weaknesses during the first quarter of 2008, and, subject to the satisfactory testing of the remedial actions that we have taken, we believe that no additional remedial efforts to correct them are required. See Item 4, "Controls and Procedures," below.

As part of our remediation efforts, we adopted a variety of procedures to conduct additional detailed transaction reviews and control activities with regard to our financial statements for all periods that we have identified as being affected by the material weaknesses described above. As a result of these efforts, we believe that the Unaudited Condensed Consolidated Financial Statements included in this Quarterly Report on Form 10-Q have been prepared in accordance with generally accepted accounting principles, fairly present in all material respects our financial position, results of operations and cash flow for the periods presented and are free of material errors.

Results of Operations

Third quarter comparison of revenue by class of product and service

Table 1 sets forth our change in revenue by class of product and service for the third quarter of 2008 compared to the third quarter of 2007:

Table 1

<i>(dollars in thousands)</i>	Systems and Other Products		Materials		Services		Totals	
Revenue - 3 rd Quarter 2007	\$14,549	38.1%	\$14,593	38.2%	\$ 9,086	23.7%	\$38,228	100%
Change in revenue:								
Volume								
Core products and services	529	3.6	1,237	8.5	1,628	17.9	3,394	8.9
New products and services	(4,764)	(32.7)	142	1.0	(1,937)	(21.3)	(6,559)	(17.2)
Price/Mix	(327)	(2.3)	(170)	(1.2)	—	0.0	(497)	(1.3)
Foreign currency translation	259	1.8	511	3.5	241	2.7	1,011	2.7
Net change	(4,303)	(29.6)	1,720	11.8	(68)	(0.7)	(2,651)	(6.9)
Revenue - 3 rd Quarter 2008	\$10,246	28.8%	\$16,313	45.9%	\$ 9,018	25.3%	\$35,577	100%

Despite evidence of a significant reduction in paid-parts' industry-wide demand, revenue from materials increased by \$1.7 million or 12% to \$16.3 million for the third quarter of 2008, from \$14.6 million for the 2007 quarter and increased to 45.9% of consolidated revenue in the 2008 quarter from 38.2% in the 2007 quarter. This increase was primarily due to the growing contribution of recurring revenue from our newer integrated systems. For the third quarter of 2008, our integrated systems accounted for 27% of all materials' revenue, reflecting a 5 percentage point sequential improvement since the first quarter of 2008. The increase in materials' revenue from 2007 primarily reflected a \$1.4 million net increase in materials' volume and \$0.5 million of favorable foreign currency translation.

Revenue from systems and other products decreased by \$4.3 million or 30% to \$10.2 million for the quarter ended September 30, 2008 from \$14.5 million in the third quarter of 2007. The decrease from 2007 arose primarily from a \$4.2 million net decrease in the volume of core and new products and an unfavorable \$0.3 million combined effect of price and mix, partially offset by a \$0.3 million favorable impact from foreign currency translation. The decrease in volume from systems was due to lower sales of large-frame systems that was only partially offset by an increase in unit volume from the sale of 3-D Printers.

Large-frame systems represented 31% of total systems' revenue for the third quarter of 2008, while sales of small-frame systems and 3-D Printers accounted for the remaining 69% compared to 53% in the 2007 third quarter. Revenue from 3-D Printers was helped by the introduction earlier this year of our ProJet™ 3000 3-D Printers and growing demand for our Dental Professional Printers.

Systems and other products fell to 28.8% of consolidated revenue in the 2008 quarter from 38.1% in the 2007 quarter primarily reflecting the increase in sales of materials as a percentage of total revenue.

Systems orders and sales tend to fluctuate on a quarterly basis as a result of a number of factors, including the types of systems ordered by customers, customer acceptance of newly-introduced products, the timing of product orders and shipments, global economic conditions and fluctuations in foreign currency exchange rates. Our customers generally purchase our systems as capital equipment items, and their purchasing decisions may have a long lead time. Due to the relatively high list price of certain systems and the overall low unit volume of systems sales in any particular period, the acceleration or delay of orders and shipments of a small number of systems from one period to another can significantly affect revenue reported for our systems for the period involved. Revenue reported for systems' sales in any particular period is also affected by revenue recognition rules prescribed by generally accepted accounting principles. However, production and delivery of our systems is generally not characterized by long lead times, and therefore, backlog is generally not a material factor in our business.

As used in this Management's Discussion and Analysis, the combined effect of changes in product mix and average selling prices, sometimes referred to as price and mix effects, relates to changes in revenue that are not able to be specifically related to changes in unit volume. Among these changes are changes in the product mix of our materials and our systems as the trend toward smaller, more economical systems has continued and the influence of new systems and materials on our operating results has grown. Our reporting systems are not currently configured to produce more quantitative information regarding the effect of price and mix changes on revenue.

Revenue from services decreased by \$0.1 million or 1% to \$9.0 million for the third quarter of 2008, from \$9.1 million for the 2007 quarter and increased to 25.3% of consolidated revenue from 23.7% for the 2007 quarter. The decrease in service revenue was primarily the result of a \$0.3 million decrease in volume, partially offset by \$0.2 million of favorable foreign currency translation.

Nine-month comparison of revenue by class of product and service

Table 2 sets forth our change in revenue by class of product and service for the first nine months of 2008 compared to the same period of 2007:

Table 2

<i>(dollars in thousands)</i>	Systems and Other Products		Materials		Services		Totals	
Revenue - Nine Months								
2007	\$ 40,405	36.2%	\$44,887	40.2%	\$26,294	23.6%	\$111,586	100%
Change in revenue:								
Volume								
Core products and services	905	2.2	(1,986)	(4.4)	1,534	5.8	453	0.4
New products and services	(14,043)	(34.7)	2,021	4.5	(2,116)	(8.0)	(14,138)	(12.7)
Price/Mix	1,018	2.5	(33)	(0.1)	—	0.0	985	0.9
Foreign currency translation	1,290	3.2	2,573	5.7	1,271	4.8	5,134	4.6
Net change	(10,830)	(26.8)	2,575	5.7	689	2.6	(7,566)	(6.8)
Revenue - Nine Months								
2008	\$ 29,575	28.4%	\$47,462	45.6%	\$26,983	26.0%	\$104,020	100%

Revenue from materials increased by \$2.6 million or 6% to \$47.5 million for the first nine months of 2008 from \$44.9 million for the 2007 period and increased to 45.6% of consolidated revenue for the first nine months of 2008 from 40.2% in the 2007 period. For the first nine months of 2008, our integrated systems accounted for 25% of all materials' revenue. The increase from 2007 was primarily the result of a \$2.0 million increase in new materials' volume and \$2.6 million of favorable foreign currency translation, partially offset by a \$2.0 million decrease in core materials' volume. The materials' increase as a percentage of total revenue was partially due to the decline in revenue from systems and other products in the 2008 period.

As discussed above, on a consolidated basis, revenue for the first nine months of 2008 declined by 7% to \$104.0 million from \$111.6 million for the first nine months of 2007. In each quarter, this reflected lower systems' revenue. After decreasing modestly in the first quarter of 2008, materials' revenue increased in both the second and third quarters of 2008 while service revenue, which increased in the first and second quarters of 2008, declined by \$0.1 million in the third quarter.

Revenue from systems and other products decreased by \$10.8 million or 27% to \$29.6 million for the nine months ended September 30, 2008 from \$40.4 million in the same period of 2007 and declined to 28.4% of consolidated revenue for the first nine months of 2008 from 36.2% in the 2007 period. The decline arose primarily from a \$13.1 million net decrease in the volume of systems sold, partially offset by a favorable \$1.0 million combined effect of price and mix and a \$1.3 million favorable impact from foreign currency translation.

Revenue from services increased by \$0.7 million or 3% to \$27.0 million for the first nine months of 2008 from \$26.3 million for the same period of 2007 and increased to 26.0% of consolidated revenue from 23.6% for the 2007 period. The increase was primarily the result of \$1.3 million of favorable foreign currency translation, partially offset by a \$0.6 million net decrease in volume. The services' increase as a percentage of total revenue reflected the relative change in services as a component of total revenue compared to systems and materials.

Change in third quarter revenue by geographic region

Geographically, our decline in revenue in both the third quarter and first nine months of 2008 resulted from lower revenue in both the United States and the Asia-Pacific region, which was partially offset by higher European revenue in both periods.

Table 3 sets forth the change in revenue by geographic area for the third quarter of 2008 compared to the third quarter of 2007:

Table 3

<i>(dollars in thousands)</i>	U.S.		Europe		Asia-Pacific		Net change in Consolidated Revenue	
Revenue - 3 rd Quarter 2007	\$16,042	42.0%	\$15,364	40.2%	\$ 6,822	17.8%	\$38,228	100%
Volume	(237)	(1.5)	(548)	(3.6)	(2,380)	(34.9)	(3,165)	(8.3)
Price/Mix	(1,699)	(10.6)	589	3.9	613	9.0	(497)	(1.3)
Foreign currency translation	—	0.0	644	4.2	367	5.4	1,011	2.7
Net change revenue	(1,936)	(12.1)	685	4.5	(1,400)	(20.5)	(2,651)	(6.9)
Revenue - 3 rd Quarter 2008	\$14,106	39.7%	\$16,049	45.1%	\$ 5,422	15.2%	\$35,577	100%

Revenue from U.S. operations declined by \$1.9 million or 12% to \$14.1 million from \$16.0 million in the third quarter of 2007. The decrease was due to lower volume and the unfavorable combined effect of price and mix.

Revenue from European operations increased by 4% to \$16.0 million, from \$15.4 million in the prior-year quarter. This increase was due primarily to the \$0.6 million favorable impact of foreign currency translation, as the \$0.6 million favorable combined effect of price and mix and a \$0.5 million decline in volume largely offset each other.

Revenue from Asia-Pacific operations decreased by \$1.4 million or 21% to \$5.4 million from \$6.8 million in the prior-year quarter due primarily to a \$2.4 million decline in volume, partially offset by a favorable \$0.6 million combined effect of changes in price and mix and the \$0.4 million favorable effect of foreign currency translation.

Change in nine-month revenue by geographic region

Table 4 sets forth the change in revenue by geographic area for the first nine months of 2008 compared to the first nine months of 2007:

Table 4

<i>(dollars in thousands)</i>	U.S.		Europe		Asia-Pacific		Net change in Consolidated Revenue	
Revenue - Nine Months 2007	\$48,950	43.9%	\$46,426	41.6%	\$16,210	14.5%	\$111,586	100%
Volume	(6,656)	(13.6)	(4,478)	(9.6)	(2,551)	(15.8)	(13,685)	(12.3)
Price/Mix	(96)	(0.2)	835	1.8	246	1.5	985	0.9
Foreign currency translation	—	0.0	3,860	8.3	1,274	7.9	5,134	4.6
Net change revenue	(6,752)	(13.8)	217	0.5	(1,031)	(6.4)	(7,566)	(6.8)
Revenue - Nine Months 2008	\$42,198	40.6%	\$46,643	44.8%	\$15,179	14.6%	\$104,020	100%

Revenue from U.S. operations declined by \$6.8 million or 14% to \$42.2 million from \$49.0 million in the first nine months of 2007 due to lower volume.

Revenue from European operations increased by \$0.2 million to \$46.6 million, from \$46.4 million in the prior-year period. This increase was primarily due to a \$3.9 million favorable impact of foreign currency translation and a \$0.8 million combined favorable effect of changes in price and mix that were largely offset by a \$4.5 million decline in volume.

Revenue from Asia-Pacific operations decreased by \$1.0 million or 6% to \$15.2 million from \$16.2 million in the prior-year period due primarily to a \$2.6 million decrease in volume that was partially offset by \$1.3 million of favorable foreign currency translation and the favorable \$0.2 million combined effect of changes in price and mix.

Gross profit and gross profit margins — Third Quarter

Table 5 sets forth gross profit and gross profit margins for our products and services for the third quarters of 2008 and 2007:

Table 5

<i>(dollars in thousands)</i>	Quarter Ended September 30,			
	2008		2007	
	Gross Profit	% Revenue	Gross Profit	% Revenue
Systems	\$ 1,125	11.0%	\$ 5,677	39.0%
Materials	10,260	62.9	7,943	54.4
Services	2,403	26.6	2,318	25.5
Total	<u>\$ 13,788</u>	38.8%	<u>\$ 15,938</u>	41.7%

The consolidated gross profit margin in the third quarter of 2008 was down to 38.8% of revenue from 41.7% of revenue for the 2007 quarter. On a consolidated basis, gross profit for the third quarter of 2008 decreased by 13% to \$13.8 million from \$15.9 million in the third quarter of 2007, primarily as a result of lower large-frame systems sales, which resulted in absorption of overhead over fewer units, and a change in systems revenue mix toward small-frame systems and 3-D Printers. As a general matter, small-frame systems and 3-D Printers generate lower gross profit margins than large-frame systems. These declines were partially offset by higher materials revenue, which carries the highest gross profit margin of any of our classes of products or services. Gross profit was also negatively impacted by duplicate supply chain costs related to our efforts to discontinue the outsourcing of our domestic logistics activities and to relocate them to our facility in Rock Hill (\$0.3 million), and by the costs associated with our 3-D Printer inventory, including the planned build-up of our V-Flash® Desktop Modeler finished goods inventory in anticipation of commercial shipments of this new system (\$0.3 million). The change in cost of sales also included \$0.8 million of unfavorable foreign currency exchange effects related to fluctuations in the U.S. dollar relative to other currencies. Most of this currency effect relates to materials that we purchase or produce outside the United States. We have begun taking steps to mitigate this foreign exchange exposure. These steps include transferring production of certain of these materials that are sold in U.S. dollars to the United States and more closely managing the hedging of our currency exposure to items that we acquire or produce in other currencies. We believe that the combined impact of the items mentioned above negatively affected our gross profit margin by approximately 2 percentage points in the third quarter after offsetting the favorable effect of foreign currency translation on revenue for the quarter.

The combined effect of the lower systems sales, net unfavorable foreign exchange rate effects, duplicate supply chain costs, and 3-D Printer inventory costs impaired our progress toward improving our gross profit margins. We are working on additional gross profit improvement objectives, which include returning domestic third-party logistics activities in-house. However, we anticipate that our planned build-up of V-Flash® inventory and subsequent shipments will adversely impact gross profit margins by \$0.5 million to \$1.0 million per quarter for the near term.

Systems gross profit for the third quarter of 2008 decreased by \$4.6 million or 80% to \$1.1 million, from \$5.7 million for the 2007 quarter, and gross profit margins for systems decreased by 28 percentage points to 11.0% of revenue from 39.0% of revenue in the 2007 quarter, primarily due to lower large-frame systems sales, which resulted in absorption of overhead over fewer units, and a change in systems revenue mix toward small-frame systems and 3-D Printers.

Materials gross profit for the third quarter of 2008 increased by \$2.3 million or 29% to \$10.3 million, from \$7.9 million for the 2007 quarter, and gross profit margins for materials increased to 62.9% of revenue from 54.4% of revenue in the 2007 quarter.

Gross profit for services for the third quarter of 2008 increased by \$0.1 million or 4% to \$2.4 million, from \$2.3 million for the 2007 quarter, and gross profit margins for services increased by 1 percentage point to 26.6% of revenue from 25.5% of revenue in the 2007 quarter.

Gross profit and gross profit margins — Nine Months

Table 6 sets forth gross profit and gross profit margins for our products and services for the first nine months of 2008 and 2007:

Table 6

<i>(dollars in thousands)</i>	Nine Months Ended September 30,			
	2008		2007	
	Gross Profit	% Revenue	Gross Profit	% Revenue
Systems	\$ 4,515	15.3%	\$ 13,408	33.2%
Materials	29,826	62.8	26,434	58.9
Services	6,193	23.0	5,478	20.8
Total	<u>\$ 40,534</u>	39.0%	<u>\$ 45,320</u>	40.6%

The consolidated gross profit margin for the first nine months of 2008 decreased to 39.0% of revenue from 40.6% of revenue for the same period of 2007. On a consolidated basis, gross profit for the first nine months of 2008 decreased by \$4.8 million to \$40.5 million, from \$45.3 million in the same period of 2007, primarily as a result of lower large-frame systems sales, which resulted in absorption of overhead over fewer units, partially offset by higher materials revenue, which carries the highest gross profit margin of any of our classes of products or services. Gross profit was also negatively impacted by certain supply chain and third-party logistics inefficiencies, which resulted in higher cost of goods sold and additional freight charges, and by higher warranty costs. The change in cost of sales also included \$3.6 million of unfavorable foreign currency exchange effects related to fluctuations in the U.S. dollar relative to other currencies. Most of this currency effect relates to materials that we purchase or produce outside the United States.

Systems gross profit for the first nine months of 2008 decreased by \$8.9 million or 66% to \$4.5 million, from \$13.4 million for the same period in 2007, and gross profit margins for systems decreased by 18 percentage points to 15.3% of revenue from 33.2% of revenue in the 2007 period. The decline in gross profit was primarily due to the decline in volume, which resulted in the absorption of fixed costs over fewer units.

Materials gross profit for the first nine months of 2008 increased by \$3.4 million or 13% to \$29.8 million, from \$26.4 million for the 2007 period, and gross profit margins for materials increased by 4 percentage points to 62.8% of revenue from 58.9% of revenue in the 2007 period.

Gross profit for services for the first nine months of 2008 increased by \$0.7 million or 13% to \$6.2 million, from \$5.5 million for the same period in 2007, and gross profit margins for services increased by 2 percentage points to 23.0% of revenue from 20.8% of revenue in the 2007 period. The improved gross profit was due to the combined effect of a decline in fixed costs associated with our decision to cease servicing certain legacy products and the favorable effect of foreign currency translation on service revenue, partially offset by higher warranty costs.

Operating expenses

As shown in Table 7, total operating expenses decreased by \$1.2 million or 8% to \$14.3 million in the third quarter of 2008 from \$15.5 million in the third quarter of 2007. This decrease was due to \$1.5 million in lower SG&A expenses, partially offset by a \$0.3 million increase in research & development (“R&D”) expenses.

During the third quarter, we undertook additional cost reduction programs, including curtailment of certain planned discretionary expenses for the balance of 2008. We expect to recognize benefit from these programs in the fourth quarter of 2008.

Table 7

<i>(dollars in thousands)</i>	Quarter Ended September 30,			
	2008		2007	
	Amount	% Revenue	Amount	% Revenue
Selling, general and administrative	\$ 10,414	29.3%	\$ 11,883	31.1%
Research and development	3,916	11.0	3,623	9.5
Total	\$ 14,330	40.3%	\$ 15,506	40.6%

As shown in Table 8, total operating expenses decreased by \$4.8 million or 9% to \$47.1 million in the first nine months of 2008 from \$51.9 million in the same period of 2007. This decrease was primarily due to \$5.6 million in lower SG&A expenses, partially offset by \$0.9 million of increased R&D expenses, both of which are discussed below. As discussed above, on a sequential-quarter basis, our operating expenses in the first nine months of 2008 declined by \$1.3 million in the first quarter, by \$2.3 million in the second quarter and by \$1.2 million in the third quarter, continuing a favorable trend that began in the third quarter of 2007.

Table 8

<i>(dollars in thousands)</i>	Nine Months Ended September 30,			
	2008		2007	
	Amount	% Revenue	Amount	% Revenue
Selling, general and administrative	\$ 36,033	34.6%	\$ 41,647	37.3%
Research and development	11,091	10.7	10,238	9.2
Total	\$ 47,124	45.3%	\$ 51,885	46.5%

Selling, general and administrative expenses

SG&A expenses declined by \$1.5 million to \$10.4 million in the third quarter of 2008, compared to \$11.9 million in the third quarter of 2007, related to:

- \$0.7 million in lower marketing and travel costs;
- \$0.5 million in lower incentive compensation costs;
- \$0.4 million of lower contract labor and consultant costs; and
- \$0.3 million decline in stock-based compensation expense.

Partially offsetting the decline was:

- \$0.5 million increase in legal fees relating to pending litigation.

SG&A expenses for the third quarter of 2008 included \$0.2 million of unfavorable foreign currency translation.

SG&A expenses declined by \$5.6 million to \$36.0 million for the first nine months of 2008, compared to \$41.6 million for the same period of 2007, primarily related to:

- \$2.7 million of lower contract labor and consultant costs;
- \$2.1 million decline in severance and stock-based compensation expense;
- \$0.8 million in lower accounting fees; and
- \$0.5 million in lower incentive compensation costs.

Partially offsetting the decline was:

- \$0.6 million of expenses associated with the previously disclosed first quarter Audit Committee investigation of anonymous claims of wrongdoing by certain members of management.

SG&A expenses for the first nine months included a \$1.3 million unfavorable impact of foreign currency translation.

Research and development expenses

R&D expenses increased by 8% to \$3.9 million in the third quarter of 2008 from \$3.6 million in the third quarter of 2007. R&D expenses also increased by 8% to \$11.1 million in the first nine months of 2008 from \$10.2 million in the same period of 2007. R&D costs in 2008 included costs associated with the V-Flash[®] Desktop Modeler and other new product development activities, including the new products that we have introduced this year.

We are continuing to work on selected new product developments, and we expect to incur approximately \$4 million of R&D expenses in the fourth quarter of 2008.

Operating income (loss)

As discussed above, our operating loss for the third quarter of 2008 was \$0.5 million, reversing \$0.4 million of operating income in the 2007 third quarter. This operating loss arose from our lower revenue and lower gross profit in the quarter, which were partially offset by a reduction in operating expenses, as discussed above.

Our loss from operations for the nine months ended September 30, 2008 and 2007 was \$6.6 million. On a sequential-quarter basis, our operating loss in the first nine months of 2008 declined from \$3.2 million in the first quarter to \$2.8 million in the second quarter and \$0.5 million in the third quarter, reflecting sequential improvement notwithstanding our lower revenue in the 2008 periods.

The following table sets forth the operating income or loss by geographic area for the third quarter and first nine months of 2008 and 2007:

Table 9

<i>(in thousands)</i>	<u>Quarter Ended Sept. 30,</u>		<u>Nine Months Ended Sept. 30,</u>	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
Income (loss) from operations:				
United States	\$ (1,974)	\$ 1,337	\$ (10,380)	\$ (5,481)
Germany	(68)	204	756	577
Other Europe	294	184	1,372	595
Asia Pacific	<u>1,379</u>	<u>171</u>	<u>2,238</u>	<u>405</u>
Subtotal	(369)	1,896	(6,014)	(3,904)
Inter-segment elimination	<u>(173)</u>	<u>(1,464)</u>	<u>(576)</u>	<u>(2,661)</u>
Total	<u>\$ (542)</u>	<u>\$ 432</u>	<u>\$ (6,590)</u>	<u>\$ (6,565)</u>

With respect to the United States, in the 2008 and 2007 periods, the changes in operating income (loss) by geographic area reflected the same factors that affected our consolidated operating results discussed above. As most of our operations outside the U.S. are conducted through sales and marketing subsidiaries, the changes in operating income (loss) in those operations resulted primarily from changes in transfer pricing and in foreign currency translation.

Interest and other expense (income), net

Interest and other expense (income), net for the third quarter of 2008 was net expense of \$0.1 million, compared to net income of \$(0.1) million in the 2007 third quarter.

For the first nine months of 2008, interest and other expense, net declined to \$0.4 million in 2008 from \$1.1 million in 2007. The decline for the nine-month period resulted from interest income generated by 2008 cash balances and lower interest expense due to the absence in the 2008 periods of bank borrowings and other outstanding debt that we discharged in 2007.

Provisions for income taxes

Our provisions for income taxes primarily reflect tax expense associated with income taxes in foreign jurisdictions.

We recorded slightly higher provisions for income taxes in the 2008 periods than in the 2007 periods. These amounted to \$0.4 million and \$1.1 million, respectively, in the quarter and nine months ended September 30, 2008, compared to \$0.2 million and \$0.4 million for the quarter and nine months ended September 30, 2007.

Net income (loss)

Our net loss for the quarter ended September 30, 2008 was \$1.0 million (\$0.04 per diluted share), reversing net income of \$0.3 million (\$0.01 per diluted share) in the 2007 third quarter. This net loss arose from our operating loss in the third quarter of 2008 and the effect of the tax provisions and changes in interest and other expense (income), net discussed above.

Our net loss for the nine months ended September 30, 2008 decreased modestly to \$8.0 million (\$0.36 per diluted share) from a net loss of \$8.1 million (\$0.40 per share) for the nine months ended September 30, 2007 and reflected the same factors that affected our net loss for the third quarter of 2008.

Financial Condition and Liquidity

During the first nine months of 2008, our primary sources of liquidity were cash on hand and, to a lesser extent, cash flow from financing activities, and our uses of cash were for operating and investing activities. We believe that our financial resources are adequate for our current and anticipated future needs. See “*Working capital*,” “*Cash flow*” and “*Outstanding debt and capitalized lease obligations*” below.

Working capital

Our net working capital decreased by \$8.7 million to \$32.2 million at September 30, 2008 from \$40.9 million at December 31, 2007. Of this decline, \$5.2 million was attributable to the first quarter of 2008, \$2.1 million was attributable to the second quarter of 2008, and the \$1.4 million difference was attributable to the third quarter of 2008.

These declines in working capital resulted from declines in cash and cash equivalents in each period that were only partially offset by the net effect of other working capital items, most notably changes in accounts receivable, inventory, accounts payable and accrued liabilities. Cash and cash equivalents declined by \$7.8 million in the first quarter, \$2.8 million in the second quarter and \$1.0 million in the third quarter. See “*Cash flow*” below.

Table 10 provides a summary of the net changes in working capital items between September 30, 2008 and December 31, 2007.

Table 10

<i>(in thousands)</i>	Increase (Decrease)
Working capital at December 31, 2007	\$ 40,906
Changes in current assets:	
Cash and cash equivalents	(11,570)
Accounts receivable, net of allowances	(6,934)
Inventories, net of reserves	3,873
Prepaid expenses and other current assets	(2,329)
Deferred income tax assets	(29)
Total current assets	<u>(16,989)</u>
Changes in current liabilities:	
Current portion of long-term debt	(240)
Current portion of capitalized lease obligations	11
Accounts payable	(4,274)
Accrued liabilities	(2,189)
Customer deposits	52
Deferred revenue	(1,629)
Total current liabilities	<u>(8,269)</u>
Net change in working capital	<u>(8,720)</u>
Working capital at September 30, 2008	<u>\$ 32,186</u>

Our unrestricted cash and cash equivalents declined by \$11.6 million to \$18.1 million, from \$29.7 million at December 31, 2007. This decrease resulted from \$7.9 million of cash used in operating activities including the \$5.3 million purchase of Tangible Express’ equipment in the first quarter and \$4.4 million of cash used in investing activities, partially offset by \$0.7 million of cash provided by financing activities. See “*Cash Flow*” below.

Accounts receivable, net of allowances, decreased by \$6.9 million to \$24.2 million at September 30, 2008 from \$31.1 million at December 31, 2007. The changes in accounts receivable over the first nine months of 2008 primarily reflect changes in our revenue in the ordinary course of business. Days’ sales outstanding decreased by one day to 63 days at September 30, 2008 from 64 days at December 31, 2007. Accounts receivable more than 90 days past due increased to 10% of gross receivables at September 30, 2008 from 6% of gross receivables at December 31, 2007. Our allowance for doubtful accounts decreased to \$1.9 million at September 30, 2008 from \$2.1 million at December 31, 2007. We regularly review our allowance for doubtful accounts, and we believe that it was adequate at each date reported.

Components of inventories at September 30, 2008 and December 31, 2007 were as follows:

Table 11

<i>(in thousands)</i>	2008	2007
Raw materials	\$ 1,613	\$ 835
Inventory held by assemblers	—	197
Work in process	25	126
Finished goods and parts	24,599	21,189
Total cost	26,237	22,347
Less: reserves	(2,323)	(2,306)
Inventories, net	<u>\$ 23,914</u>	<u>\$ 20,041</u>

Inventories increased by \$3.9 million to \$23.9 million at September 30, 2008 from \$20.0 million at December 31, 2007. This increase in inventory resulted from short-term materials' and systems' inventory purchases that we undertook to support future revenue, including purchases of V-Flash® Desktop Modelers and certain key components to support future production of 3-D Printers. We maintained \$2.3 million of inventory reserves at September 30, 2008 and December 31, 2007. We believe that our inventory reserves were adequate at each date reported. Based on our current go-to-market strategy, we expect inventories to decline to between \$20 million to \$22 million by the end of 2008.

In connection with our outsourcing activities with our third-party assemblers, we sell to them from time to time components of our raw materials' inventory related to systems that they assemble. We record those sales in our financial statements as a product financing arrangement under SFAS No. 49, "Accounting for Product Financing Arrangements." Continuing a trend of reducing such balances, we held no SFAS No. 49 inventory sold to assemblers at September 30, 2008 compared to \$0.2 million of such inventory at December 31, 2007. In accordance with SFAS No. 49, at the end of each period, we maintained an accrued liability equal to the amount of outstanding SFAS No. 49 inventory held by assemblers, representing our non-contractual obligation to repurchase assembled systems and refurbished parts produced from such inventory.

As shown in Table 11 above, with the outsourcing of substantially all of our equipment assembly and refurbishment activities, the majority of our inventory now consists of finished goods, including primarily systems, materials and service parts, as our third-party assemblers have taken over supply-chain responsibility for the assembly and refurbishment of systems. As a result, we generally no longer hold in inventory most parts for systems' production or refurbishment. In calculating inventory reserves, we direct our attention to spare parts that we hold in inventory and that we expect to be used over the expected life cycles of the related systems, to inventory related to the blending of our engineered materials and composites, and to our ability to sell items that are recorded in finished goods inventory, a large portion of which are new systems.

The components of prepaid expenses and other current assets at September 30, 2008 and December 31, 2007 were as follows:

Table 12

<i>(in thousands)</i>	2008	2007
Value added tax ("VAT") and sales tax refunds	\$ 283	\$ 670
Progress payments to assemblers	70	866
Non-trade receivables	15	1,076
Other	1,732	1,817
Total	<u>\$ 2,100</u>	<u>\$ 4,429</u>

Our prepaid expenses and other current assets decreased by \$2.3 million to \$2.1 million at September 30, 2008 from \$4.4 million at December 31, 2007, which included, in addition to VAT and sales tax refunds and other items arising in the ordinary course of business, a \$1.9 million reduction in non-trade receivables and progress payments to assemblers. The non-trade receivables shown in Table 12, the inventory held by assemblers shown in Table 11, and a related accrued liability in an amount that corresponds to the book value of inventory held by assemblers included in accrued liabilities on our Condensed Consolidated Balance Sheets relate to the accounting for our outsourcing arrangements pursuant to SFAS No. 49. The non-trade receivables shown in Table 12 declined as a result of a reduction in semi-finished systems and parts that our third-party assemblers purchased from us to complete the assembly of systems for which we had not received payment from them at period end. The decline in progress payments to assemblers also reflects a continuing downward trend.

Accounts payable declined by \$4.3 million to \$16.4 million at September 30, 2008, from \$20.7 million at December 31, 2007. The decline was primarily due to higher payables that corresponded to higher revenue in the quarter ended December 31, 2007.

Customer deposits increased by \$0.1 million as we deferred the revenue in the first nine months of 2008 related to certain deposits made during the period.

Deferred revenue decreased by \$1.6 million to \$10.1 million at September 30, 2008, from \$11.7 million at December 31, 2007, primarily due to a net decrease in maintenance contracts, installation, training and warranty revenue in the first nine months of 2008.

The changes in the first nine months of 2008 that comprise the other components of working capital not discussed above arose in the ordinary course of business. These components of working capital include \$10.1 million of accrued liabilities, \$0.2 million in current installments of capitalized lease obligations, \$0.7 million of deferred income tax assets, \$1.2 million of restricted cash and \$3.5 million in assets held for sale related to our Grand Junction facility.

As discussed elsewhere in this Form 10-Q, we closed the Grand Junction facility in 2006 and subsequently listed it for sale, with \$3.5 million of net assets related to that facility recorded on our Condensed Consolidated Balance Sheets as assets held for sale at both September 30, 2008 and December 31, 2007. Also, at September 30, 2008 and December 31, 2007, we have a current liability of \$3.1 million and \$3.3 million, respectively, consisting of the outstanding principal amount of the industrial development revenue bonds that financed this facility. We continue to actively market this facility. See Notes 3 and 6 to the Condensed Consolidated Financial Statements.

Differences between the amounts of working capital item changes in the cash flow statement and the amounts of balance sheet changes for those items are primarily the result of foreign currency translation adjustments.

Cash flow

Table 13 summarizes the cash provided by or used in operating activities, investing activities and financing activities, as well as the effect of changes in foreign currency exchange rates on cash, for the first nine months of 2008 and 2007.

Table 13

<i>(in thousands)</i>	2008	2007
Cash used in operating activities	\$ (7,926)	\$ (1,393)
Cash used in investing activities	(4,384)	(1,989)
Cash provided by financing activities	715	14,662
Effect of exchange rate changes on cash	25	(139)
Net increase (decrease) in cash and cash equivalents	<u>\$ (11,570)</u>	<u>\$ 11,141</u>

Cash flow from operations

For the nine months ended September 30, 2008, we used \$7.9 million of net cash for operating activities. For the first nine months of 2008, this use of cash consisted of our \$8.0 million net loss and \$6.8 million of cash consumed by net changes in operating accounts, partially offset by \$6.9 million of non-cash items included in our net loss.

Of our \$8.0 million 2008 net loss, \$3.7 million arose from the first quarter of 2008, \$3.3 million arose from the second quarter of 2008, and the remaining \$1.0 million arose from the third quarter of 2008, indicating a sequential improvement in our results of operations as the first nine months of 2008 progressed. Net changes in operating accounts consumed \$5.6 million of cash in the first quarter of 2008, \$0.2 million in the second quarter of 2008 and \$1.1 million in the third quarter of 2008.

Non-cash items were \$2.2 million in the first quarter of 2008, \$2.2 million in the second quarter of 2008 and \$2.5 million in the third quarter of 2008. For the first nine months of 2008, the principal non-cash items included in our \$8.0 million net loss were \$5.0 million of depreciation and amortization and \$1.1 million of stock compensation.

Changes in operating accounts that resulted in a use of cash for the first nine months of 2008 included the following:

- A \$6.8 million increase in inventories;
- A \$3.6 million decrease in accounts payable;
- A \$2.3 million decrease in accrued liabilities; and
- A \$1.5 million decrease in deferred revenue.

Changes in operating accounts for the first nine months of 2008 that resulted in a source of cash included the following:

- A \$5.3 million decrease in accounts receivable; and
- A \$2.2 million decrease in prepaid expenses and other current assets.

See “*Working capital*” above for a discussion of the reasons for these changes in operating account items.

For the nine months ended September 30, 2007, we used \$1.4 million of net cash for operating activities. This use of cash consisted of an \$8.1 million net loss and \$1.3 million of cash consumed by net changes in operating accounts, partially offset by \$8.0 million of non-cash items included in the net loss.

Of this \$8.1 million 2007 net loss, \$3.1 million arose from the first quarter of 2007, \$5.3 million arose from the second quarter of 2007, and our net income for the third quarter of 2007 reduced this loss by \$0.3 million. Net changes in operating accounts consumed \$7.0 million of cash in the first quarter of 2007 but generated \$2.7 million of cash in the second quarter of 2007 and \$3.0 million of cash in the third quarter of 2007.

Non-cash items were \$3.1 million in the first quarter of 2007, \$2.1 million in the second quarter of 2007 and \$2.8 million in the third quarter of 2007. As was the case in the 2008 period, for the first nine months of 2007, the principal non-cash items included in our \$8.1 million net loss were \$5.4 million of depreciation and amortization and \$2.2 million of stock compensation.

Changes in operating accounts for the first nine months of 2007 that resulted in a use of cash included the following:

- A \$9.1 million decrease in accounts payable;
- A \$3.4 million decrease in customer deposits; and
- A \$1.3 million decrease in accrued liabilities.

Changes in operating accounts for the first nine months of 2007 that resulted in a source of cash included the following:

- A \$7.1 million decrease in accounts receivable;
- A \$3.2 million decrease in inventories; and
- A \$2.0 million decrease in prepaid expenses and other current assets.

Cash flow from investing activities

Net cash used in investing activities in the first nine months of 2008 increased to \$4.4 million from \$2.0 million for the first nine months of 2007. This increase was primarily due to our higher level of 2008 capital expenditures, of which \$1.9 million arose in the first quarter of 2008, \$1.4 million arose in the second quarter of 2008 and \$0.8 million arose in the third quarter of 2008.

Cash flow from financing activities

Net cash provided by financing activities decreased to \$0.7 million for the nine months ended September 30, 2008 compared to \$14.7 million for the nine months ended September 30, 2007. This decrease resulted primarily from the absence in the 2008 period of any significant financing activities. Net proceeds from stock option exercises and restricted stock awards declined to \$1.1 million in the 2008 period from \$2.8 million in the 2007 period, primarily reflecting the smaller number of outstanding stock options and lower option exercise activity. Net cash provided by financing activities in the 2007 period included \$20.4 million of proceeds related to our private placement of common stock in June 2007, partially offset by the repayment of \$8.2 million of bank borrowings in the third quarter of 2007.

Outstanding debt and capitalized lease obligations

At September 30, 2008, industrial development revenue bonds and capitalized lease obligations decreased to \$11.8 million from \$12.2 million at December 31, 2007, due to scheduled payments in 2008 of principal on our outstanding industrial development revenue bonds and capital lease installments.

Our outstanding industrial development revenue bonds and capitalized lease obligations at September 30, 2008 and December 31, 2007 were as follows:

Table 14

<i>(in thousands)</i>	2008	2007
Debt:		
Industrial development revenue bonds	<u>\$ 3,085</u>	<u>\$ 3,325</u>
Capitalized lease obligations:		
Current portion of capitalized lease obligations	\$ 192	\$ 181
Long-term portion of capitalized lease obligations	<u>8,517</u>	<u>8,663</u>
Total	<u>\$ 8,709</u>	<u>\$ 8,844</u>
Total current portion	\$ 3,277	\$ 3,506
Total long-term portion	<u>8,517</u>	<u>8,663</u>
Total debt	<u>\$ 11,794</u>	<u>\$ 12,169</u>

Capitalized lease obligations

Our outstanding capitalized lease obligations relate to two lease agreements that we entered into in 2006 with respect to our Rock Hill, South Carolina facility, one of which covers the facility itself and the other of which covers certain furniture and fixtures that we acquired for use in the facility. The carrying value of the headquarters facility and the furniture and fixture leases at September 30, 2008 and December 31, 2007 was \$8.7 million and \$8.8 million, respectively.

Industrial development revenue bonds

Our Grand Junction, Colorado facility was financed by industrial development revenue bonds in the original aggregate principal amount of \$4.9 million. At September 30, 2008 and December 31, 2007, the outstanding principal amount of these bonds was \$3.1 million and \$3.3 million, respectively. Interest on the bonds accrues at a variable rate of interest and is payable monthly. The interest rate at September 30, 2008 and December 31, 2007 was 8.15% and 3.52%, respectively. Due to disruptions in global credit markets, the interest rate at September 30, 2008 was abnormally high and has subsequently returned to a more normal level. Principal payments are due in semi-annual installments through August 2016. We reclassified this indebtedness to current indebtedness in 2006 in anticipation of the sale of the Grand Junction facility. We have made all scheduled payments of principal and interest on these bonds. The bonds are collateralized by, among other things, a first mortgage on the facility, a security interest in certain equipment and an irrevocable letter of credit issued by Wells Fargo Bank, N.A. pursuant to the terms of a reimbursement agreement between us and Wells Fargo. We are required to pay an annual letter of credit fee equal to 1% of the stated amount of the letter of credit.

This letter of credit is in turn collateralized by \$1.2 million of restricted cash that Wells Fargo holds, which we reclassified as a short-term asset during 2006 in anticipation of the sale of the Grand Junction facility. Wells Fargo has a security interest in that restricted cash as partial security for the performance of our obligations under the reimbursement agreement. We have the right, which we have not exercised, to substitute a standby letter of credit issued by a bank acceptable to Wells Fargo as collateral in place of the funds held by Wells Fargo.

The reimbursement agreement, as amended, contains financial covenants that require, among other things, that we maintain a minimum tangible net worth (as defined in the reimbursement agreement) of \$23 million plus 50% of net income from July 1, 2001 forward and a fixed-charge coverage ratio (as defined in the reimbursement agreement) of no less than 1.25 to 1.00. We are required to demonstrate our compliance with these financial covenants as of the end of each calendar quarter. On May 7, July 31, and October 27, 2008, the bank waived our non-compliance with certain of the financial covenants set forth in this facility for the periods ended March 31, June 30 and September 30, 2008, respectively, each in consideration for a \$32,000 non-refundable waiver fee.

Financial instruments

We conduct business in various countries using both the functional currencies of those countries and other currencies to effect cross border transactions. As a result, we are subject to the risk that fluctuations in foreign exchange rates between the dates that those transactions are entered into and their respective settlement dates will result in a foreign exchange gain or loss. When practicable, we endeavor to match assets and liabilities in the same currency on our balance sheet and those of our subsidiaries in order to reduce these risks. We also, when appropriate, enter into foreign currency contracts to hedge exposures arising from these transactions. We have not adopted hedge accounting under SFAS No. 133, "Accounting for Derivatives and Hedging Activities," as amended by SFAS No. 137 and SFAS No. 138, and we recognize all gains and losses (realized or unrealized) in cost of sales in our Consolidated Statements of Operations.

We believe that the financial instruments that we have entered into are not material to our results of operations or financial condition and that they are beneficial to the management of the foreign currency exposure arising from our global operations. The dollar equivalent of our foreign currency contracts and their related fair values as of September 30, 2008 and December 31, 2007 were as follows:

Table 15

<i>(in thousands)</i>	Foreign Currency Purchase Contracts	
	2008	2007
Notional amount	\$ 1,074	\$ 2,905
Fair value	1,041	2,891
Net unrealized gain (loss)	\$ (33)	\$ (14)

At September 30, 2008 and December 31, 2007, the notional amount of these contracts at their respective settlement dates amounted to \$1.1 million and \$2.9 million, respectively. The 2008 and 2007 contracts related primarily to purchases of inventory from third parties. The notional amount of the purchase contracts aggregated 1.2 million Swiss francs and 3.3 million Swiss francs, respectively.

The net fair value of all foreign exchange contracts at September 30, 2008 and December 31, 2007 reflected nominal unrealized losses. The foreign currency contracts outstanding at September 30, 2008 expire at various times between October 22, 2008 and November 19, 2008. The foreign currency contracts outstanding at December 31, 2007 expired at various times between January 3, 2008 and February 13, 2008.

Changes in the fair value of derivatives are recorded in cost of sales in our Consolidated Statements of Operations. Depending on their fair value at the end of the reporting period, derivatives are recorded either in prepaid expenses and other current assets or in accrued liabilities in our Consolidated Balance Sheets.

The total impact of foreign currency items on the Condensed Consolidated Statements of Operations for the quarter and nine months ended September 30, 2008 were gains (losses) of \$(0.2) million and \$0.2 million, respectively, compared to nominal gains for the quarter and nine months ended September 30, 2007.

Stockholders' equity

Stockholders' equity decreased by \$6.2 million to \$98.5 million at September 30, 2008, from \$104.8 million at December 31, 2007. This decrease was comprised of our \$8.0 million net loss for the first nine months of 2008 and \$0.5 million of foreign currency translation adjustments included in accumulated other comprehensive income for the first nine months of 2008, partially offset by:

- \$1.1 million of net proceeds from stock option exercises and restricted stock awards during the first nine months of 2008; and
- \$1.1 million of stock compensation expense recorded in stockholders' equity in accordance with SFAS No. 123(R) during the first nine months of 2008.

Recent Accounting Pronouncements

See Note 14 to the Condensed Consolidated Financial Statements for a discussion of recent accounting pronouncements.

Critical Accounting Policies and Significant Estimates

For a discussion of our critical accounting policies and estimates, refer to “Management’s Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Policies and Estimates” in our Annual Report on Form 10-K for the year ended December 31, 2007.

Forward-Looking Statements

Certain statements made in this Quarterly Report on Form 10-Q that are not statements of historical or current facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from historical results or from any future results expressed or implied by such forward-looking statements.

In addition to statements that explicitly describe such risks and uncertainties, readers are urged to consider statements in future or conditional tenses or that include terms such as “believes,” “belief,” “expects,” “intends,” “anticipates” or “plans” to be uncertain and forward-looking. Forward-looking statements may include comments as to our beliefs and expectations as to future events and trends affecting our business. Forward-looking statements are based upon management’s current expectations concerning future events and trends and are necessarily subject to uncertainties, many of which are outside of our control. The factors stated under the heading “Cautionary Statements and Risk Factors” set forth below and those described in our other SEC reports, including our Form 10-K for the year ended December 31, 2007, as well as other factors, could cause actual results to differ materially from those reflected or predicted in forward-looking statements.

Any forward-looking statements are based on management’s beliefs and assumptions, using information currently available to us. We assume no obligation, and do not intend, to update these forward-looking statements.

If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may vary materially from those reflected in or suggested by forward-looking statements. Any forward-looking statement you read in this Quarterly Report on Form 10-Q reflects our current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, growth strategy and liquidity. All subsequent written and oral forward-looking statements attributable to us or individuals acting on our behalf are expressly qualified in their entirety by this paragraph. You should specifically consider the factors identified or referred to in this Form 10-Q and our other SEC reports, including our Annual Report on Form 10-K for the year ended December 31, 2007, which would cause actual results to differ from those referred to in forward-looking statements.

Cautionary Statements and Risk Factors

We recognize that we are subject to a number of risks and uncertainties that may affect our future performance. The risks and uncertainties described below are not the only risks and uncertainties that we face. Additional risks and uncertainties not currently known to us or that we currently deem not to be material also may impair our business operations. If any of the following risks actually occur, our business, results of operations and financial condition could suffer. In that event the trading price of our Common Stock could decline, and you may lose all or part of your investment in our Common Stock. The risks discussed below also include forward-looking statements, and our actual results may differ substantially from those discussed in these forward-looking statements.

These risks include and relate to:

- our access to financing and other sources of capital and our ability to generate cash flow from operations;
- the potential impairment of certain intangible assets, which could adversely impact our future earnings and stock price as well as our ability to obtain financing;
- the potential that we may have to restate our financial statements;
- our stock may be delisted if we fail to file our periodic filings required to be filed with the SEC on a timely basis;
- any failure, inadequacy, interruption, or security lapse in the enterprise resource systems or the related technology that we rely on could adversely affect our ability to effectively operate our business;
- the continuing risk in transitioning our inventory management and distribution functions from our third-party service provider;
- the impact of material weaknesses in our internal control over financial reporting, which negatively impacts our ability to report our results of operations and financial condition accurately and in a timely manner;
- our ability to successfully centralize and transition to a new shared service center for most administrative functions for all of our European subsidiaries;
- changes in energy-related expenses;
- the effect new pronouncements by accounting authorities may have on operational, financial and reporting aspects of our Company;
- our success in entering new market places and acquiring and integrating new businesses;
- the impact of the mix of products on our gross profit margin, which could cause fluctuations in our net income or loss;
- our potential involvement in product liability claims and litigation;
- competitive factors;
- our ability to develop and commercialize successful new products;
- our dependence upon a single or limited number of suppliers for components and sub-assemblies;
- our dependence upon our suppliers generally;
- factors beyond our control that cause fluctuations in our operating results;
- the costs from our business outside the U.S. may increase or our revenue from such operations may decrease, which could have a significant impact on our overall results of operations and financial condition;
- political and economic events and the uncertainty from them may have a material adverse effect on our market opportunities;
- laws that inhibit takeovers;
- variations in our operating results from quarter to quarter;
- the low daily trading volume of our Common Stock and the volatility of our stock price;
- dilution of ownership and negative impact on the market price of our common stock due to the exercise of our outstanding stock options;
- our ability to issue preferred stock; and
- our debt level.

For a more detailed discussion of such risks and uncertainties, see “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2007 and the risk factors noted in our other SEC filings.

Except as required by the federal securities laws, we undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

For a discussion of market risks at December 31, 2007, refer to “Item 7A. Quantitative and Qualitative Disclosures about Market Risk,” in our Annual Report on Form 10-K for the year ended December 31, 2007. During the first nine months of 2008, there were no material changes or developments that would materially alter the market risk assessment performed as of December 31, 2007, except as discussed in the Liquidity and Capital Resource section under Financial Instruments.

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures

As of September 30, 2008, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) pursuant to Rules 13a-15 and 15d-15 under the Exchange Act. These controls and procedures are designed to provide assurance that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, in a manner that is intended to allow timely decisions regarding required disclosures.

As a result of this evaluation and recognizing the material weaknesses that we identified in our Annual Report on Form 10-K for the year ended December 31, 2007, we determined that our disclosure controls and procedures remained ineffective as of September 30, 2008. In making this determination, we took into account the remedial actions that we are taking, have taken and have disclosed with respect to these material weaknesses and our belief, which is discussed below, that, subject to the testing of the effectiveness of our remedial actions as of December 31, 2008, we have substantially completed the remediation of those material weaknesses. Notwithstanding our efforts, there is a risk that we ultimately may be unable to achieve the goal of fully remedying these material weaknesses and that the corrective actions that we have implemented and are implementing may not fully remedy the material weaknesses that we have identified and disclosed or prevent similar or other control deficiencies or material weaknesses from having an adverse impact on our business and results of operations or our ability to timely make required SEC filings in the future.

In any case, based on a number of factors, including our performance of manual procedures to provide assurance of the proper collection, evaluation and disclosure of the information included in our consolidated financial statements, management has concluded that the consolidated financial statements included in this Quarterly Report on Form 10-Q fairly present, in all material respects, our financial position, results of operations and cash flow for the periods presented in conformity with GAAP and that they are free of material errors.

Internal control over financial reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Internal control over financial reporting is a process designed under the supervision of our principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of September 30, 2008 based on the criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”).

As a result of the material weaknesses described in our Annual Report on Form 10-K for the year ended December 31, 2007, our management concluded that as of September 30, 2008 we did not maintain effective internal control over financial reporting based on the criteria established in Internal Control-Integrated Framework issued by COSO.

After having identified those material weaknesses in connection with the preparation of our financial statements for the period ended December 31, 2007, we have been working to identify and remedy the causes of the problems that led to the existence of those material weaknesses, and we believe that:

- we have identified the primary causes of and appropriate remedial actions for these problems;
- we have, except as otherwise noted below and subject to the completion of testing that we are conducting and plan to complete as of December 31, 2008, remedied substantially all of these material weaknesses; and
- we are continuing to implement additional appropriate corrective measures to enable us to determine that those material weaknesses have been fully remedied.

With respect to testing, we have adopted, and pursued during the first nine months of 2008, a program that is designed to evaluate whether the remedial actions we have taken have been in effect for a sufficient period of time to determine their effectiveness as well as to test the effectiveness of those remedial actions. Notwithstanding our efforts, there is a risk that we ultimately may be unable to achieve the goal of fully remedying these material weaknesses and that the corrective actions that we have implemented and are continuing to implement may not fully remedy the material weaknesses that we have identified or prevent similar or other control deficiencies or material weaknesses from having an adverse impact on our business and results of operations or our ability to timely make required SEC filings in the future.

The remedial actions that we implemented during the first quarter of 2008 to remedy these material weaknesses included the following:

1. With respect to a lack of oversight and review of our inventory costing system, we:
 - Transitioned away from spreadsheet-based look-ups and calculations and set-up enterprise resource planning (“ERP”) system reports to retrieve and validate data for various inventory accounts;
 - Set up reports and schedules in our ERP system to tie reserve amounts into in order to better assure accurate information and reporting;
 - Added an additional level of review for manual calculations; and
 - Activated ERP system functionality to eliminate certain manual processes.
2. With respect to the ineffective design and operation of controls for certain inventory shipments and recognition of the related revenue, we:
 - Worked with the third-party service provider that we utilized for outsourcing logistics and warehousing of our spare-parts inventory and certain of our finished goods supply activities to provide more timely and accurate information; and
 - Implemented specific period-end cut-off testing to ensure that revenue and expenses are being recorded in proper periods.

Subject to testing, we believe that no additional remedial actions were necessary in the third quarter of 2008.

There were no material changes in our internal control over financial reporting during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

On March 14, 2008, DSM Desotech Inc. filed a complaint in an action titled DSM Desotech Inc. v. 3D Systems Corporation in the United States District Court for the Northern District of Illinois (Eastern Division) asserting that we engage in anticompetitive behavior with respect to resins used in large-frame stereolithography machines. The complaint further asserts that we are infringing two of DSM Desotech's patents relating to stereolithography machines. We understand that DSM Desotech estimates the damages associated with its claims to be in excess of \$40 million. On or about June 6, 2008, we filed a motion to dismiss the non-patent causes of action. We also filed an answer to the patent-related claims and asserted various defenses and counterclaims. We intend to vigorously contest all of the claims asserted by DSM Desotech.

We are also involved in various other legal matters incidental to our business. Our management believes, after consulting with counsel, that the disposition of these other legal matters will not have a material effect on our consolidated results of operations or consolidated financial position.

Item 1A. Risk Factors.

There have been no material changes from the risk factors as previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2007.

Item 6. Exhibits.

The following exhibits are included as part of this filing and incorporated herein by this reference:

- 3.1 Certificate of Incorporation of Registrant. (Incorporated by reference to Exhibit 3.1 to Form 8-B filed on August 16, 1993, and the amendment thereto, filed on Form 8-B/A on February 4, 1994.)
- 3.2 Amendment to Certificate of Incorporation filed on May 23, 1995. (Incorporated by reference to Exhibit 3.2 to Registrant's Registration Statement on Form S-2/A, filed on May 25, 1995.)
- 3.3 Certificate of Designation of Rights, Preferences and Privileges of Preferred Stock. (Incorporated by reference to Exhibit 2 to Registrant's Registration Statement on Form 8-A filed on January 8, 1996.)
- 3.4 Certificate of Designation of the Series B Convertible Preferred Stock, filed with the Secretary of State of Delaware on May 2, 2003. (Incorporated by reference to Exhibit 3.1 to Registrant's Current Report on Form 8-K, filed on May 7, 2003.)
- 3.5 Certificate of Elimination of Series A Preferred Stock filed with the Secretary of State of Delaware on March 4, 2004. (Incorporated by reference to Exhibit 3.6 of Registrant's Annual Report on Form 10-K for the year ended December 31, 2003, filed on March 15, 2004.)
- 3.6 Certificate of Amendment of Certificate of Incorporation filed with Secretary of State of Delaware on May 19, 2004. (Incorporated by reference to Exhibit 3.1 of the Registrant's Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2004, filed on August 5, 2004.)
- 3.7 Certificate of Amendment of Certificate of Incorporation filed with Secretary of State of Delaware on May 17, 2005. (Incorporated by reference to Exhibit 3.1 of the Registrant's Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2005, filed on August 1, 2005.)
- 3.8 Certificate of Elimination of Series B Preferred Stock filed with the Secretary of State of Delaware on June 9, 2006. (Incorporated by reference to Exhibit 3.1 of Registrant's Current Report on Form 8-K, filed on June 9, 2006.)
- 3.9 Amended and Restated By-Laws. (Incorporated by reference to Exhibit 3.2 of Registrant's Current Report on Form 8-K filed on December 1, 2006.)
- 31.1 Certification of Principal Executive Officer filed pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 dated November 5, 2008.
- 31.2 Certification of Principal Financial Officer filed pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 dated November 5, 2008.
- 32.1 Certification of Principal Executive Officer filed pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 dated November 5, 2008.
- 32.2 Certification of Principal Financial Officer filed pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 dated November 5, 2008.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

EXHIBIT INDEX

Exhibit No.	Description
31.1	Certification of Principal Executive Officer filed pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 dated November 5, 2008.
31.2	Certification of Principal Financial Officer filed pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 dated November 5, 2008.
32.1	Certification of Principal Executive Officer filed pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 dated November 5, 2008.
32.2	Certification of Principal Financial Officer filed pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 dated November 5, 2008.

**Certification of
Principal Executive Officer of
3D Systems Corporation**

I, Abraham N. Reichental, certify that:

1. I have reviewed this report on Form 10-Q of 3D Systems Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flow of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

This certification is provided pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and accompanies the Quarterly Report on Form 10-Q (the "Form 10-Q") for the quarter ended September 30, 2008 of 3D Systems Corporation (the "Issuer").

I, Abraham N. Reichental, the Principal Executive Officer of the Issuer, certify that, pursuant to 18 U.S.C. § 1350, as adopted pursuant to §906 of the Sarbanes-Oxley Act of 2002, to the best of my knowledge:

- (i) the Form 10-Q fully complies with the requirements of Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934; and
- (ii) the information contained in the Form 10-Q fairly presents, in all material respects, the financial condition and results of operations of the Issuer.
