

## Empowering healthcare professionals through 3D technologies

With over 25 years of experience in anatomical modeling, 3D Systems is the partner of choice, providing a tool for complex anatomy visualization.

3D Systems offers a perfect combination of 3D printing processes, expertise and materials to integrate the right solution into your specific medical workflow. 3D Systems On Demand Anatomical Modeling services allow medical professionals to upload an STL, OBJ or PLY file, choose materials and have a non-diagnostic use model 3D printed by our team of experts.

### **SLA Translucent**

Translucent models with selective coloration to highlight vital structures.

### **SLA Opaque**

Opaque models printed in our most robust material.

### **MJP**

Models printed in a combination of flexible and rigid materials.

### **CJP**

Full color models to aid in visualizing complex structures.

## HOW IT WORKS

### **STEP 1:**

Upload your STL, OBJ or PLY file to our On Demand Anatomical Models website

### **STEP 2:**

Receive an instant quote

### **STEP 3:**

Place your order

### **STEP 4:**

Models typically ship within 5 business days
