VisiJet® PXL Material

With VisiJet PXL composite for the ProJet CJP x60 printer series, choose from a range of finishing options to meet your needs, from ColorBond infiltration for stronger functional prototypes to wax for creating concept models quickly, safely and affordably.

Description		Quick-cure infiltrant, ideal for color models to improve strength and color vibrancy. The most popular solution.	Two-part epoxy infiltrant, ideal for functional models to dramatically improve the strength.	For monochrome models only. Provides sufficient strength for safe handling and is very economical.	Ideal for fast, affordable, color models. Sufficient strength and smooth surface finish.

* Requires 24 hrs of drying time @ 100 °F (37.8 °C)

DISCLAIMER: It is the responsibility of each customer to determine that its use of any VisiJet® and infiltrant materials is safe, lawful and technically suitable to the customer's intended applications. The values presented here are for reference only and may vary. Customers should conduct their own testing to ensure suitability for their intended application.
